PROFESSIONAL EXPERIENCE

BEBO TECHNOLOGIES PVT. LTD.

Software Engineer

Chandigarh, IN

2022-Present

Software engineer with 2 years of hands-on full-stack development. Proficient in the .NET framework, C#, Angular, and React, focused on full-stack web development. Illustrates a track record of consistently delivering high-caliber solutions with precision and timeliness.

- Developed and deployed the Import Tools feature, enhancing data ingestion from user-provided Excel sheets into an automated validation process, resulting in a time savings of 25+ hours per month on manual reporting efforts.
- Established direct client contact, forging connections as a billable resource. We achieved a stellar five-star team rating, highlighting an outstanding 98% client satisfaction level.
- Highlighted persistent dedication to efficiently resolving challenges, raising project success rates by 20%.
- Devised an AI-based resume parser that is more efficient, transforming the recruiting process for the organization and reducing the manual effort by 70%.
- The LangChain tool offers effective AI-based application testing while also serving as a powerful demonstration of our expertise to potential clients, leading to the acquisition of new business opportunities.

PROJECTS

VRM ADMIN CONSOLE

- Collaborated on cross-team cooperation to carefully gather requirements, design strong system architectures, and deploy cutting-edge features, resulting in a 25% increase in user workflow productivity.
- Enforced coding best practices with cutting-edge tools like C#, ASP.NET, and React.js to guarantee the production of great, high-quality, and maintainable-written code.
- Delivered a robust Import Tools feature, using Excel sheet data to create an interactive dashboard showcasing data visualizations, validations, types, and values, effectively optimizing reporting processes and saving 25+ hours per month.
- Solved intricate technical challenges, showcasing robust problem-solving skills, and contributing to the project's timely delivery.

RESUME PARSER & AI APP TESTING TOOL

- Built an in-house AI-based resume parser that automates the extraction of data from resumes to speed up and simplify the applicant screening process, saving 12+ hours per week.
- We collaborated on an in-house AI application testing tool, enhancing our ability to validate AI solutions.
- This demonstration of expertise is securing new business opportunities and establishing a competitive edge in the market.

HOUSINGVOUSING

- Contributed to the property management project with Angular, .NET Core, and SQL Server.
- Deployed a responsive and user-friendly UI on Google Firebase and the backend on Microsoft Azure.
- Added comprehensive functionalities encompassing property listings and robust user authentication.

EDUCATION

KURUKSHETRA UNIVERSITY

Master of Computer Applications – 8.82 CGPA

Kurukshetra, HR

2019-2022
